## First Japanese Industrial Standards (JIS) Stainless Steel Coils Supply to Japan

We were honored to welcome representatives from MARUBENI-ITOCHU STEEL (M) SDN BHD, Mr. Satoru Kojima (MD) and Takeuchi (Assistant Manager) to our facility for an important visit today. We are excited to share that they were very satisfied with the quality for the first trial order bound for Japan and our overall performance.

Even better, the materials used are in full compliance with JIS (Japanese Industrial Standards), meeting the strict expectations of the Japanese market.

This milestone marks a strong start to what we hope will be a long and successful partnership.

We thank MARUBENI-ITOCHU STEEL (M) SDN BHD for their trust and collaboration, and we look forward to continued success together.
