# A Defining Milestone in Sustainable Stainless Steel

## A Defining Milestone in Sustainable Stainless Steel

Bahru Stainless is proud to announce the successful attainment of the SIRIM Eco-Label Licence (EL000457), valid through March 2028.

This certification represents more than compliance it is a strategic validation of our commitment to sustainable manufacturing, operational transparency, and long-term ESG value creation.

At a time when global industries are accelerating toward stricter environmental standards, Bahru Stainless is positioned at the forefront delivering premium stainless steel solutions aligned with the evolving expectations of international markets, regulators, and investors.

### Strategic ESG Foundations

- **Responsible Manufacturing**  
Our production processes are officially recognised for low-hazardous environmental impact — reinforcing our commitment to safe and sustainable operations.
- **Circular Material Advantage**  
Stainless steel produced at Bahru is fully recyclable, supporting circular economy models and reducing lifecycle environmental footprint.
- **ESG-Ready Supply Chain**  
We empower our customers and partners to meet increasingly stringent ESG, green building, and compliance requirements across global markets.

### Certified Technical Capability

The Eco-Label certification covers our austenitic stainless steel plates, sheets, and coils, manufactured in accordance with MS 2240-1:2009 ensuring uncompromised quality alongside environmental responsibility.

### Investor Perspective

This milestone strengthens Bahru Stainless' positioning as a future-ready industrial player — combining:

- Sustainable production credentials
- High-quality manufacturing excellence
- Transparent and compliant operations

As ESG continues to shape capital allocation and procurement decisions worldwide, this certification reinforces our long-term competitiveness and value proposition.

Bahru Stainless

Delivering premium stainless steel with responsibility, precision, and trust.
