A Successful 2025 Exhibition Journey with Bahru Stainless

This year has been nothing short of remarkable exhibition journey for Bahru Stainless.

Our

team has had the privilege of showcasing Malaysia's only stainless steel mill on the world stage.

FABTECH, Chicago on 8-11 September 2025

METALEXPO, Istanbul on 24-27 September 2025

CMTS, Toronto on 29 Sep-2 October 2025

Across these global platforms, we proudly presented our wide product range — coils, plates, and slits, along with our premium polished finishes: No. 4, Scotch-Bright, hairline, and mirror. Each event gave us the opportunity to connect with industry leaders, partners, and customers, exchanging ideas on the latest innovations and the future of stainless steel.

A heartfelt thank you to everyone who visited our booths, engaged with our team, and shared your valuable perspectives. Your support turned these exhibitions into a true success, fueling our mission to continuously deliver innovative, sustainable, and high-quality stainless steel solutions for the global market.

As we look ahead, Bahru Stainless remains committed to driving excellence, advancing sustainability, and strengthening Malaysia's role in the global stainless steel industry.
